

Aviation Continuing Education, Inc.
“The New Leader in FAA Approved Ground Safety Training”

**Allied Aviation, Inc. selects Aviation Continuing Education, Inc.
For 14 CFR 139.321 Fuel Safety Training**

*Web-Based Training Provides FAA-Compliant Fuel Safety Training & Compliance Management for FBOs
And Major Into Plane Fuel Providers.*

August 20, 2008 – [Aviation Continuing Education, Inc.](#) (ACE) is pleased to announce that Allied Aviation, Inc. has selected us as their online provider for federally mandated fuel safety training. “While ACE has had great success in delivering live in-class training, the online format will provide our clients with far more flexibility. In addition, eliminating the client’s need to travel will reduce a client’s cost considerably,” stated [Jay Shanley](#), COO of ACE. He further commented, “Allied Aviation, Inc. is the first player in the industry to recognize the significant savings attributed with online computer based training. Additionally, ACE will provide world-class compliance management system approved by the TSA and the FAA through its partner Noverant, Inc. of Raleigh, NC. We are excited about this opportunity to greatly expand the accessibility and affordability of our training and allow our customers to track all their training records in a government-approved compliance management system.”

A pioneer in online aviation fuel safety training and compliance management, ACE’s agreement with Allied Aviation, Inc. expands the training capability into another important segment of the aviation market.

“FAA-mandated training required by 14 CFR 139 poses a significant responsibility on FBOs and into plane refuelers for training of their supervisors and line personnel in fuel and fire safety,” said [Jay Shanley](#), Vice President and COO of ACE. Allied has made the right move and will immediately see cost savings by shaving travels expenses for two or more employees at each of their 26 locations.

In addition, the ability of an operator to prove their training compliance, as required by 14 CFR 139.301, can be quite burdensome and costly. By utilizing Noverant’s FAA-approved compliance management system, FBO’s can greatly simplify their record-keeping and compliance management. All personnel (active or terminated) records are available online, and e-signatures meet the strict guidelines as detailed in 21 CFR Part 11, which requires long-term secure storage of all training events and government-approved electronic signatures.

The first training modules are now available online through [Aviation Continuing Education, Inc.](#) FAA Fuel Safety and Inspection Training for Supervisory and Line Service Technicians is accepting students as of August 4, 2008, followed by Airport Operations Area (AOA) Driver Safety and Airport Self Inspection training. Additionally, aviation specific general safety, HAZWOPER and a variety of OSHA related modules are planned for 2009.

About ACE, Inc.

Aviation Continuing Education, Inc. provides quality, consistent, safety training to our nations air fuel handlers. A top tier provider incorporating extraordinary detail in its programming ACE, Inc., delivers its comprehensive training programs in both online and classroom formats.
