“The New Leader in FAA Approved Ground Safety Training”

Aviation Continuing Education, Inc. Selects Noverant for Fuel Safety Training

*Web-Based Training Provides FAA-Compliant Fuel Safety Training & Compliance Management for FBOs
And Major Into Plane Fuel Providers.*

July 14, 2008 – [Aviation Continuing Education, Inc.](#) (ACE) is pleased to announce the selection of Noverant, Inc. as a technology provider for a variety of “**ONLINE**” FAA-mandated safety training courses. “While ACE has had great success in delivering live in-class training, the online format will provide our clients with far more flexibility. In addition, eliminating the client’s need to travel will reduce a client’s cost considerably,” stated [Jay Shanley](#), COO of ACE. He further commented, “Noverant is the first player in the industry to offer a cost-effective, world-class compliance management system approved by the TSA and the FAA. We are excited about this opportunity to greatly expand the accessibility and affordability of our training and allow our customers to track all their training records in a government-approved compliance management system.”

ACE, a leading provider of FAA approved fuel safety courses and aviation fire safety consulting services, expanded aggressively into the aviation industry in 2005 with a single goal to provide the very best cost effective fuel safety training to our nation’s fuel handlers.

A pioneer in online aviation fuel safety training and compliance management, ACE’s agreement with Noverant expands the training capability into another important segment of the aviation market.

“FAA-mandated training required by 14 CFR 139 poses a significant responsibility on FBOs for training of their supervisors and line personnel in fuel safety,” said [Jay Shanley](#), Vice President and COO of ACE. “We looked long and hard to find the right FAA-approved compliance management provider and found Noverant to be the best candidate by far. Not only is their programming FAA and TSA approved their systems are scalable allowing ACE to train an infinite number of students simultaneously.

In addition, the ability of an operator to prove their training compliance, as required by 14 CFR 139.301, can be quite burdensome and costly. By utilizing Noverant’s FAA-approved compliance management system, FBO’s can greatly simplify their record-keeping and compliance management. All personnel (active or terminated) records are available online, and e-signatures meet the strict guidelines as detailed in 21 CFR Part 11, which requires long-term secure storage of all training events and government-approved electronic signatures.

The first training module will be made available online through [Aviation Continuing Education, Inc.](#) and [Noverant](#). FAA Fuel Safety Training will be available beginning in early August 2008, followed by Airport Operations Area (AOA) Driver Safety and Airport Self Inspection training. Additionally, aviation specific general safety, HAZWOPER and a variety of OSHA related modules are planned for 2009.

About ACE, Inc.

Aviation Continuing Education, Inc. Jay Shanley comes to you with over 30 years experience in the fire and fuel service management industry. He has 10 distinguished years as Astronaut Rescue Leader at NASA and 11 years as Fire Chief and Safety Manager at one of our nation's fastest growing airports. Jay also has years of experience at firefighting and airport fueling operations.

Sara Shanley brings 15 years of experience as co-owner of a company committed to bringing continuing education to independent insurance agents in over 40 states. Sara also brings public service experience to bear by serving many years with the Orange County Sheriff's Office in Central Florida, first as a volunteer then as a full time Deputy Sheriff.

ACE quickly rose to the top tier of providers by incorporating extraordinary detail in its programming. The company now leads the nation by providing its comprehensive training programs in online and classroom formats. Being the first to employ technology to improve effectiveness and reduce the cost of aviation ground safety training, Ace, Inc. is dedicated to the premise that each man and woman engaged in handling our nation's air fuel supply is fully informed and aware that “At the end of the day, we are each responsible for our own safety and that of the flying public.” To that end, ACE, Inc. is authorized by the FAA to provide ground safety training programs in accordance with 14 CFR 139. The company is located in Orlando, Florida near the University of Central Florida Research Park.
